# Mohammad Abu Asali

## Front End Developer

I'm Mohammad Abou Asali, a seasoned Front-End Developer with over 4 years of hands-on experience in crafting engaging and responsive user interfaces. I am passionate about creating seamless and visually appealing web experiences that enhance user satisfaction. Throughout my career, I have demonstrated proficiency in HTML, CSS, JavaScript and Angular. staying abreast of the latest industry trends and technologies. My expertise extends to utilizing modern frameworks and libraries to deliver dynamic and interactive web applications. My keen eye for detail and commitment to delivering high-quality code ensures that the end product not only meets but exceeds client expectations. In addition to my technical skills, I am dedicated to continuous learning and improvement. I thrive in dynamic environments and welcome challenges that allow me to expand my skill set and contribute to the success of innovative project

## Experience

2023

Palmira - Dubai

### Angular Developer/Metrix+

Metrix+ is a transformative strategy and performance management solution designed to turn cumbersome performance routines into valuable business practices. It prioritizes measuring key objectives and offers ecosystem management with the capability to cascade and aggregate performance measures. It empowers decision-making, enhances organizational responsiveness, and provides agility in dynamic market conditions. Metrix+ offers a user-friendly experience for managing strategy-to-execution processes, positioning itself as the next-generation xP&A (Extended Planning and Analytics) tool. I work on this project using various libraries such as amcharts, blakan trees, angular Cheat Sheet, and others.

2022

Tatweer - Damascus

### Front-End Developer/GPS

Focused on monitoring public vehicle operations and tracking their routes, our system enables us to verify the functionality of the vehicles and keep track of their locations. The project showcases real-time vehicle monitoring on a map, complemented by graphical representations that provide a comprehensive overview of vehicle movement.

2021

Tatweer - Damascus

### Front-End Developer/NGO

The task and transaction management system in the Ministry of Social Affairs is essential for ensuring efficient and effective operations. One key feature is its focus on dynamic forms, allowing for seamless application submission and creation of new forms as needed. This enables the ministry to adapt to changing requirements and processes, ultimately improving overall efficiency and effectiveness.

## 2021

tatweer - Damascus

### Front end developer/parking

The parking management system, with Angular as the frontend and Dot Net as the backend, along with MySQL, is designed to efficiently handle a group of equipment, cameras, and sensors that regulate the operations of each parking lot. These devices transmit data to a central system, allowing for the monitoring of parking occupancy and managing payment methods. The integration of Angular and Dot Net provides a robust and user-friendly interface for users to interact with the system, while MySQL ensures secure and reliable data storage. This comprehensive approach to parking management is essential for ensuring smooth and organized operations within parking facilities.

## 2020 - 2023

Freelance projects - University projects

### Full Stack developer

As a front-end developer, I create visually appealing, user-friendly projects with modern design, seamless navigation, and responsiveness across devices. I focus on crafting engaging user interfaces to enhance the overall user experience, using cutting-edge technologies and frameworks to deliver dynamic and captivating interfaces.

i worked as back end developer (laravel framework +mysql) in lot projects (survey-cms-netflix-furniture company management) and as front end (travel-dentist website)
